This is based on a time-lapse drone video shot during a two-week field trial on the Cairn carpet located at the rearÂ . A device to be mounted within a camera to provide motion compression at the camera's end for input into the camera video data stream so that the camera will. MT â€“ Mt. Mograph Motion. Scales:Â .Q: Vb.net - Find text in the searched file, replacing and saving to another file I'm trying to open a text file for finding a string value in it using a big string value. So, I'm trying to find the string in it and replace the value of the string with the one I'm searching for. Then, I'm trying to save the updated file. The following code does the job but when I've searched for the string value there's nothing in the file, and it shows the result as 2nd string. Private Sub button1_Click(sender As Object, e As EventArgs) Handles button1.Click Dim myText As String = My.Settings.strFileName Dim fileOpen As System.IO.StreamReader = My.Computer.FileSystem.OpenTextFileReader(myText) Dim textReader As System.IO.StreamWriter = My.Computer.FileSystem.OpenTextFileWriter(myText) Dim stringTest As String = "My Message" textReader.WriteLine("My Message" + stringTest) fileOpen.Close() textReader.Close() fileOpen.Close() End Sub Private Sub button2_Click(sender As Object, e As EventArgs) Handles button2.Click My.Settings.strFileName = "Xyz.txt" Dim myText As String = My.Settings.strFileName Dim f As IO.StreamWriter = My.Computer.FileSystem.OpenTextFileWriter(myText, False) f.WriteLine("Replace this with my text!") f.Close() End Sub A: Try the following instead. Private Sub button1_Click(sender As Object, e As EventArgs) Handles
