Q: How to align a row of text? For example, I want to have a row of text that looks like this. Example: A: I did a quick mockup of what it might look like if you insert a min-height / line-height and play with the vertical-align: .col1 { background-color: #CCC; margin: 0 0 10px 0; padding: 10px; font-size: 0.9em; min-height:100px; line-height:100px; vertical-align: bottom; display: block; } .col2 { background-color: #AAA; margin: 10px 0 0 0; padding: 10px; font-size: 0.9em; min-height:100px; line-height:100px; vertical-align: bottom; display: block; } You'll have to play around with the vertical-align if the text gets too small/tall. A: You can use a pseudo element with text-align: center on it. The css goes like this: .text { position: relative; top: -5px; left: -50px; height: 1px; width: 150px; background: #fff; padding: 5px; color: #000; margin-left: -50px; } .text::before { position: absolute; top: 0; left: 0; height: 1px; content: "; width: 100%; background: #222;

This is the beginning of 'The Bodies' exhibition at Hunterian Museum and Art Gallery. Click here to view the exhibition on our blog. Bodies, body parts and body fragments are the subject of this striking exhibition. These intriguing and curious assemblages of anatomy and taxidermy are arranged with a purpose and significance. They are artistic creations, which are part of ongoing projects that some of the artists are exploring in their practice. The exhibition features an exciting selection of the most striking specimens on display in the Hunterian Museum and Art Gallery. The room is filled with anatomical specimens alongside objects of taxidermy. The assembled group of objects evoke a haunting atmosphere. These can be explored with hands or by staring in wonderment. The exhibit is also accompanied by captivating lighting and atmosphere, which encourage a memorable experience. A myriad of vignettes and screens, used to demonstrate the importance and appreciation of a body in general, as well as those of particular individuals. These are in part composed of various torsos, which have been lovingly assembled by restorers in an effort to understand the anatomy and function of the various organs. The artifacts are arranged with a purpose, to invoke a reaction, and foster thought and inspiration. The Bodies exhibition is an excellent showcase of diverse art in the Museum and Art Gallery. But these collections, although small, are as diverse as the people who are walking through the gallery admiring them. The exhibit is not only a display of anatomic remains and taxidermy, but a voyage into the interesting world of our bodies and their associated anatomy. The artists have taken an original approach to exhibition design, and it is quite an encounter.
