Awesome game - Very engaging and fun game with a great story and great gameplay. - SO MUCH better then the original in terms of its storytelling and game play. I really love this game. - It reminds me a bit of the System Shock series. - The voice acting is absolutely perfect in this game and really adds to the story a lot. - The NPC's are good voice acting and all have good voice acting. - The last boss is a bit annoying and is like a mix of the original and the sequel of the second game. - However the boss was pretty epic and gave me a very good feeling. 5 stars if you like it and I highly recommend it to everybody. - Best story in a game I've ever played I think... - My experience with SRIII pretty much started and ended here. The main story campaign is great and fun. Unfortunately, the side story campaigns are not very good; if you want an epic story and rpg, I highly recommend you play the main story campaign first. - Overall this is my top choice for a new game. It's definitely the best game on the market. If you are fan of the concept, the story, and the gameplay, you will love this game, I promise. The biggest problem this game has is the lag. If you don't use extreme settings, the game will work fine on most computers, however, the higher your settings, the worse it will get. - My favorite game this year. - 9.5 out of 10. - Highly recommended. - A nice little fix to one of the few games that I've ever loved. - The only game that I ever gave 8.5 out of 10 - Surprisingly good and a bit of a re-birth of the series. - A good rpg with a good story. The downside is that it isn't as good as the original Game of the Year, but that's not a bad thing by any means. - Probably one of the best title for the Wii. - It makes some of the best titles look like they belong on a Playstation or Xbox. I still say that the game is amazing, but I think it's overrated. I feel like the game got a lot of unnecessary attention due to the fact that it was on the Wii. I am always suprised when people say "This is the best game ever made", because if I would think it up, I would never say "This is the best game ever made." - The best one in series. - A great bff6bb2d33
