The gifts, the story said, included tickets to premieres, a \$19.4 million jet, an advance for a forthcoming book and other goodies. H.F. "Gus" Poynter, a Palm Beach-based lobbyist and former top official at the National Rifle Association who was named in the article, was a central figure in the lobbying scandal. But he is not the only prominent lobbyist with ties to the White House. Quicksilver Strategies, a Miami-based lobbying firm that specializes in astroturfing, has been providing top staff members in the Trump administration with trips to the Bahamas

Assignment of the human cerebrospinal fluid proline transporter (PROT) gene, chromosome 10p12, to 10q13. The molecular defect of the human hereditary defect of cerebrospinal fluid (CSF) proline transporter (PROT) remains unknown. We designed a highly conserved probe and screened a large panel of yeast artificial chromosomes (YACs). This enabled us to locate the human difunctional amino-acid transporter (DAT) gene on chromosome 10, and also to demonstrate the presence of a cDNA for the enzyme complex ornithine carbamyltransferase/carbamoyl-phosphate synthetase (OTC/CPS), presumably corresponding to ornithine decarboxylase (ODC), on human chromosome 8. Using these assignments, we determined that the human gene for the CSF proline transporter (PROT) resides on chromosome 10. Thus, further in-depth localization of the human PROT gene was carried out to narrow down the chromosomal region. To characterize the region containing the human PROT gene, and to construct a CEPH-defined physical map, we screened 39 radiation hybrid cell lines and 3 BAC clones. Combined, these data establish a region containing the human PROT gene, between D10S935 and D10S149, at 10q13.1-q13.3, localized with a resolution of about 19 cR.Q: Not Seeing "V-Position" in Unreal Engine 4 I am having problems with the V-Position in UE4.
