Where it all began, is nothing short of a massive, mountain-sized hole. Every so often, it opens up and swallows someone. Most people think they're going crazy and that something is influencing them, but those rumors are just a myth. People are simply too chicken to approach that mouth of nothingness, and would run away before they've even seen it. That is, until one brave man decided to confront it.

Game System 4STORY - ORIGIN: 4Story is a skirmishing free game with a heavy focus on the original tabletop concept, where you'll be fighting enemies of different sizes, classes and races. The world of 4Story is made for explorations. There are no dungeons, monsters or leveling up. So, there is only one world, and it's for everyone to explore. Fighting is done on the field. The world is not made by invisible walls, so there is no defense blocking you from the enemy at any moment. While the world is supposed to be open, there are still plenty of battles and content to be found.

Organized PvP The two sides of the war, Defugel and Craxion, have plenty of battles and competitions going on. In fact, it is just another way to improve your character. Either a duel or a clan fight with other guilds, PvP is always up for grabs! Fights are held in several different types of locations. 2 of them are the main cities - Defugel and Craxion. Each city is full of guilds and war factions that will fight each other to the end. This system was designed to give all players (including the support units) an opportunity to get together and fight. There are three different types of battles in 4Story: the war, no-contest fights and battles between guilds. The war is a battle fought between two or more guilds that are seeking a major objective. These are the most likely to be fought. A war is won or lost depending on how many players in each guild show up. Since the guilds can be freely chosen, a guild can enter a war and then refuse to continue if there aren't enough players. The no-contest fights are very different and aren't PvP. The purpose is just for a guild to practice its abilities or improve its attacks. The guild battles are the only battles that require two guilds. They are special because it's possible for two different guilds to face off against each other with two different alliances on both

The defendant in United States v. Tamez, 941 F.2d 770 (9th Cir.1991), signed a plea agreement and was represented by counsel. The court noted that it had "been presented with no fact situation in which a knowing, voluntary and intelligent waiver has been held to apply retroactively." Id. at 774 n. 1. In the instant case, defendant's waiver was neither knowing nor intelligent. The waiver form was not signed by defendant or his attorney and the court, the prosecutor, or defendant's attorney were not present. There is no evidence that defendant was informed, prior to signing the waiver form, that he had a right to a sentencing jury. At defendant's sentencing hearing, the trial judge commented that he was not required to determine whether defendant was sentenced under former section 210 of the act, that, at most, defendant may have violated the section of the act applicable to a given offense, and that, in any event,

he chose to sentence defendant under the provisions of the act applicable to an "accident" as defined in the act. Defendant could not waive a right that had not yet been created. People v. Gainer, 19 Mich c9d1549cdd

About these Siamese Cats The 'Siamese', or "Siam" in the Thai language, is a small, very longhair, cat whose origin is unknown. Found throughout Thailand, up to southern China, and southward as far as Sri Lanka the Siamese is a crepuscular and nocturnal panther. This makes it a very efficient hunter though somewhat less of a household pet than other shorthairs. Like all cats the Siamese mated for life. Between 56-60% of the population do so. The Siamese has been described as being an "unmated" cat since these records: "... the Siamese is completely un-mated and has no need for a mate so carries only a single cub." ("Siamese" by W.E. Lorenz) "... During mating season the Siamese is completely unmated." ("Asiatic Spices", 1988, The University of Adelaide) "... the Siamese mating season is one of purging the house." ("Tea and Sex", A Course In Cat History by Ginny Simmel) Refinements in Siamese breed history have favored male cats. Measured in a kitten competition held in Busan, South Korea, a 14 year-old male Siamese had a frequency of 0.952. The highest result recorded was 1.130 and was recorded in a 4-5 year-old male. (I'll bet I have the highest recorded male result - and its me!) Stable relatives of the Siamese cat became among the most admired short- and long-haired cats in the 19th Century. As disease, urbanization and changing customs took their toll the declining stock of the longhair cat was joined by a strong current of what are usually considered "pedigreed" Siamese. The first recorded Siamese limited pedigree is of an "Irish" cat in the 1850's. These cats became noted for their vigor, intelligence and soundness.

In the 1880's "pedigrees" of British breeds began to appear in which the Siamese was called "The Irish
