Classroom in a Book (Includes Lesson Files). In your check out summary below, you see
"Download File" and "Write comments" links. What this means is that you do
not need to complete the "File Upload" form. You can simply use the links to
download the file to your desktop. The "Write comments" link lets you enter an
optional review. Please be. Following the past year's battle of the Bitcoin and Ethereum
networks, most of the attention is no longer on the virtual coins, but the real world of
real estate. The housing market is undergoing something of a boom with the recent
crash largely reversed in the past year. Coupled with the rise of Bitcoin and Ethereum,
the real estate market has had to face two new financial institutions. Both Bitcoin and
Ethereum are transactions systems that allow the transfer of money. They do this by
allowing people to buy products (usually goods or services) by using money in
electronic form, leaving the actual physical item in the possession of the buyer.
Essentially, we send money to another party who can convert the value into goods or
services for us. Both Bitcoin and Ethereum have experienced meteoric rise in value in
the past few years, becoming two of the most valuable currencies in the world. In fact,
Bitcoin is probably the most valuable currency in the world currently. As the lead

currency of the peer-to-peer exchange, it currently has a value of over \$365 billion. Ethereum has also experienced a similar rise, only more so. The Ethereum team, unlike the developers of Bitcoin, did not simply transfer and add value with each block, but rather created a programmable scripting language to allow programmers to build complex applications (think of it as eScripts for Blockchain). This has led to it building the second largest cryptocurrency by market capitalization, only behind Bitcoin. So, what does this mean for real estate? Let's take a look at how real estate will have to deal with these developments. First, the real estate market can in some ways view Bitcoin and Ethereum as two separate markets. Bitcoin, as the biggest currency, already has products and services to its name. For example, Bitcoin digital wallets
