## What's New in the?

Tatapoum 4 is a new version of Tatapoum 3. Tatapoum 3 is a combination drum sampler and pattern sequencer with 16 channel sequencer. Tatapoum 3 was first released by the Canadian company Talbot Electronics (www.talbot.ca) in 1999. The Tatapoum 4 is based on the concepts of the older version Tatapoum 3 but now in a newly written engine with improved functions and graphics. There are two main differences between the older and the new Tatapoum 4: 1) The sound engine has been rewritten from scratch. The old engine was not very stable but the new engine is much more stable. Some of the sounds have been changed to better fit the new engine. 2) Tatapoum 4 has a new user interface, the images and the layout of the menus have been rewritten. It is far more intuitive than the older interface. Apart from the interface and some new sounds Tatapoum 4 is almost identical to the old version Tatapoum 3. Version 5.0.3 - added some new sounds and made some small changes. Version 5.0.2 - added a few more sounds. Version 5.0.1 - fixed a couple of bugs. Version 5.0 - added a couple of new sounds. Version 4.8.1 - fixed some bugs. Version 4.8 - fixed a bug. Version 4.7.1 - added a new menu category "Cymbals". Version 4.7 - added a new menu category "Crashes". Version 4.6 - fixed a bug. Version 4.5 - added some new sounds and many fixes. Version 4.4 - added more sounds. Version 4.3 - new sounds. Version 4.2 - added more sounds and made some changes to the interface. Version 4.1 - added many new sounds and interface changes. Version 4.0 - new sounds and interface. Version 3.0.1 - many fixes and corrections. Version 3.0 - the original Tatapoum Version 2.0 - first release Requirements This software runs on Windows XP and higher. Additional notes Most of the sounds in this collection are not modified from their original versions. Many of them are older samples by my favorite sound designers like John Chowning, Matthias Bossi and Keith McMillen. Tatapoum 4 can be used to create drum loops in Beatbox or as a pattern sequencer in SONAR. If you like the old version Tatapoum 3 please get the version 3.0.1. It is based on the same sound engine as Tatapoum 4. This software is distributed under the GNU GPL. See the end of this file for a license. A

## System Requirements For Tatapoum:

Minimum: OS: Windows XP SP2 (32 or 64-bit) Processor: Intel Core 2 Duo 1.6 GHz Memory: 2 GB RAM Graphics: DirectX 9.0c Compatible with DX10 DirectX: Version 9.0c Compatible with DX10 Storage: 2 GB available space Sound Card: Microsoft DirectX 9 Compatible Additional Notes: Controls: WASD or Arrow Keys to Move, Z to Jump, E to Fire, R to Reload Gamepad
